

CMPT 880/890
Paper Review Assignment

Dates: November 6 (paper chosen)
November 20 (review submitted)

Together with your research supervisor, choose a conference-sized paper in your research area for review. The review is intended to be a peer review such as would be done for a conference in your area.

The review form is available on the CMPT 880 web-page.

The evaluation/assessment is shown below.

Submit your review to Mike **and to your supervisor**. Your supervisor will evaluate the validity of your review (out of 5). Mike will assess the clarity, completeness and language quality (out of 10).

Criterion	Marks	Evaluation/Assessment
Clarity	3	Is your position clear? Would an editor or Program Chair have difficulty assessing your position?
Completeness	5	Did you address all the items on the review form? Does your review attempt to assess all aspects of quality of the submission?
Validity	5	Are your positions supported with good reasons? Do you justify all your claims? Do you draw reasonable conclusions about the work?
Language Quality	2	Spelling, grammar. Full marks for fewer than 5 errors; zero marks for more than 10 errors.
