COURSE SYLLABUS
CMPT 306: GAME MECHANICS

Catalogue Description:
This course will cover aspects of game graphics, physics, sound, input, AI and networking at an introductory level. This course is intended to provide a broad basis in computer game related fields, serving as a primer and providing context for specialized courses in fourth year.

Prerequisite(s): CMPT 270 required, Math 264 or 266 recommended or Permission of the Instructor

Class Time & Location:
Lecture Tuesday, Thursday 11:30-12:50 THORV 124
Tutorial, Monday 5:00-6:20pm Spinks 320
Or Tutorial, Thursday 1:00-2:20pm Spinks 320

Website: moodle.cs.usask.ca

Instructor Information
Instructor: Jason Bowey
Contact: Email: jason.bowey@usask.ca

Office Hours: Location: Thorvaldson 373
Hours: By Appointment

Course Objectives
• Students will learn the fundamental concepts underlying computer game development including aspects of graphics, physics, artificial intelligence and networking, to the point where they can apply this knowledge meaningfully in an industrial setting.
• Students will learn how to use the Unity development environment and engine to build robust games.
• Students will learn how to effectively work in teams towards a significant shared project goal.

</table>

The first three assignments will be constructing simple game mechanics for a basic platformer and top-down shooter. The fourth assignment will be due at the end of term and will involve implementing a Procedural Content
Generation algorithm of the student’s choice.

Tentative due date for assignments will be: October 6, October 20, November 3, and December 1

Projects will be in groups of 3-5 and will involve designing and creating a complete and polished game. See Project Requirements document on Moodle for complete details and milestones. Major milestones will consist of a project pitch to the class, several progress meetings with Instructor and TA along with a brief code review conducted by TA/Marker after each meeting, user-based playtesting, and a final game demonstration open to the department in third floor Spinks. Each project will be required to incorporate a technically complex component in line with what would be expected in a third year undergraduate course.

Tentative due dates for project milestones are: September 13 (Group formation), September 17 (Project Pitch Slides), October 8 (Project Planning), November 5 (Technical Proof of Concept), November 26 (Alpha Demo), and December 7 (Final Demo and playtesting report).

For all group meetings, appointment slots will be scheduled during the Lab/Tutorials, unless otherwise communicated with the instructor in advance, but the marks assigned for the milestone will be based on the state of the project submitted on the Sunday night prior to the meetings, to ensure fairness for all groups. Appointment slots will be available for groups to sign up one week before the appointments. Only one group member will need to sign up, and time slots will be scheduled on a first-come first-serve basis.

Criteria that must be met to Pass
Students are expected to submit a project and write the final exam

Attendance Expectation
Students are expected to attend demonstration sessions associated with project deliverables, as scheduled with the professor

Final Exam Scheduling:
The Registrar schedules all final examinations, including deferred and supplemental examinations. Students are advised not to make travel arrangements for the exam period until the official exam schedule has been posted.

Note: All students must be properly registered in order to attend lectures and receive credit for this course.

Textbook Information

Required Text
- None

Recommended Texts
- Ian Millington and John Funge, Artificial Intelligence for Games, Morgan Kaufman, 2009

Lecture Schedule
- Week 0: Course Intro
- Week 1: Game Design
Course Overview

- This course will use the Unity Development Engine and IDE, and industry standard development environment for indie and cross-platform games. Lectures will address core concepts, while the IDE and associated language constructs will be covered in tutorials.
- Because Computer Graphics is not a pre-requisite, this course will only address aspects of the 2D.
- Lectures will not be recorded. Students with DSS requirements may record the class.

Policies

Recording of Lectures
Lectures will not be recorded. Students with DSS requirements may record the class.

Late/Missed Assignments
In general, late assignments are not accepted, except with legitimate excuses (e.g. illness, bereavement)

Missed Examinations
1. "Students who have missed an exam or assignment must contact their instructor as soon as possible. Arrangements to make up the exam may be arranged with the instructor. Missed exams throughout the year are left up to the discretion of the instructor if a student may make up the exam or write at a different time. If a student knows prior to the exam that she/he will not be able to attend, they should let the instructor know before the exam."

2. "Final exams - a student who is absent from a final examination through no fault of his or her own, for medical or other valid reasons, may apply to the College of Arts and Science Dean’s office. The application must be made within three days of the missed examination along with supporting documentary evidence. Deferred exams are written during the February mid-term break for Term 1 courses and in early June for Term 2 and full year courses." (2007/08. http://www.arts.usask.ca/students/transition/tips.php)

Incomplete Course Work and Final Grades

"When a student has not completed the required course work, which includes any assignment or examination including the final examination, by the time of submission of the final grades, they may be granted an extension to permit completion of an assignment, or granted a deferred examination in the case of absence from a final examination.

Extensions past the final examination date for the completion of assignments must be approved by the Department Head, or Dean in non-departmentalized Colleges, and may exceed thirty days only in unusual..."
circumstances. The student must apply to the instructor for such an extension and furnish satisfactory reasons for the deficiency. Deferred final examinations are granted as per College policy.

In the interim, the instructor will submit a computed percentile grade for the class which factors in the incomplete coursework as a zero, along with a grade comment of INF (Incomplete Failure) if a failing grade.

In the case where the student has a passing percentile grade but the instructor has indicated in the course outline that failure to complete the required coursework will result in failure in the course, a final grade of 49% will be submitted along with a grade comment of INF (Incomplete Failure).

If an extension is granted and the required assignment is submitted within the allotted time, or if a deferred examination is granted and written in the case of absence from the final examination, the instructor will submit a revised assigned final percentage grade. The grade change will replace the previous grade and any grade comment of INF (Incomplete Failure) will be removed.

A student can pass a course on the basis of work completed in the course provided that any incomplete course work has not been deemed mandatory by the instructor in the course outline and/or by College regulations for achieving a passing grade.” (http://policies.usask.ca/policies/academic-affairs/academic-courses.php)

Examinations with Disability Services for Students (DSS)

Students who have disabilities (learning, medical, physical, or mental health) are strongly encouraged to register with Disability Services for Students (DSS) if they have not already done so. Students who suspect they may have disabilities should contact DSS for advice and referrals. In order to access DSS programs and supports, students must follow DSS policy and procedures. For more information, check http://students.usask.ca/health/centres/disability-services-for-students.php, or contact DSS at 966-7273 or dss@usask.ca.
Students registered with DSS may request alternative arrangements for mid-term and final examinations. Students must arrange such accommodations through DSS by the stated deadlines. Instructors shall provide the examinations for students who are being accommodated by the deadlines established by DSS.

**Student Supports**

Student Learning Services (SLS) offers assistance to U of S undergrad and graduate students. For information on specific services, please see the SLS web site [https://www.usask.ca/ulc/](https://www.usask.ca/ulc/).

The Student and Enrolment Services Division (SESD) focuses on providing developmental and support services and programs to students and the university community. For more information, see the SESD web site [http://www.usask.ca/sesd/](http://www.usask.ca/sesd/).
